Continuous investments in technologically advanced equipments, offers us the assurance that the chrome plating of Bruma products keep their original brightness for many years, and therefore protecting and decorating the faucet.

Le procédé de chromage de Bruma suit une méthode de contrôle de qualité très précise, appelée Brightest. Ce procédé, qui est toujours accompagné par nos ingénieurs, permet d'obtenir un finissage d'un éclat intense, durable et fort.

Des investissements continus en équipements de la plus moderne technologie nous permettent d'être sûrs qu'un produit Bruma chromé maintient son éclat le long du temps, en accomplissant pleinement la fonction de protéger et embellir le robinet.

Bruma Smooth Breeze

Desenvolvemos em exclusividade a produção do cartucho Smooth Breeze.

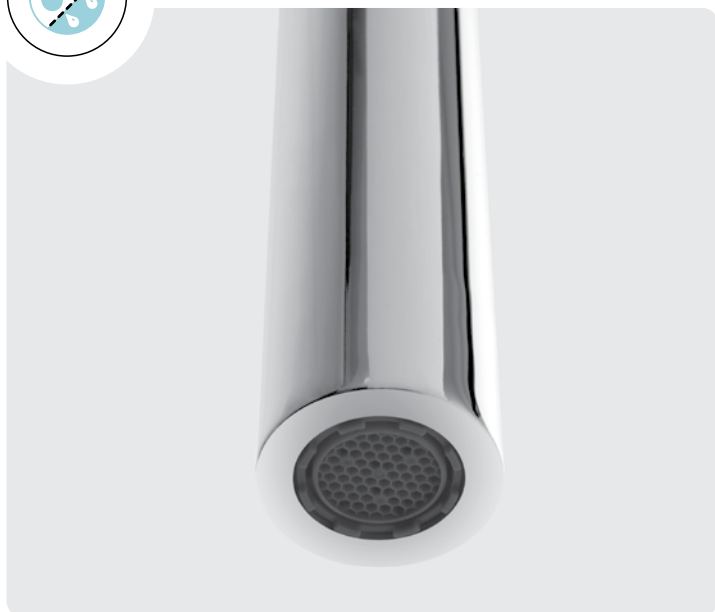

A utilização deste cartucho permite uma movimentação suave e precisa do mecanismo da torneira, como se de uma brisa se tratasse.

A eficácia no funcionamento e a qualidade tecnológica dos materiais usados na concepção possibilitam esta sensação de suavidade e a regulação da temperatura torna-se num acto sensorial de puro prazer.

We have exclusively developed the creation of the Smooth Breeze cartridge. This cartridge enables a smooth and precise movement of the faucet's handle, resembling a breeze. The efficiency of its movements and the technological quality of the materials used in its construction provide a sensation of smoothness, as the temperature regulation becomes a sensory act of sheer pleasure.

Nous avons développé, en exclusivité, la production de la cartouche Smooth Breeze. L'utilisation de cette cartouche permet, en même temps, un mouvement doux et exacte du mécanisme du robinet, comme s'il s'agissait d'une douce brise. L'efficacité dans le fonctionnement et la qualité technologique des matériaux utilisés dans la conception rendent possible cette sensation de douceur et le réglage de la température devient un acte sensoriel de pur plaisir.

Desarrollamos la producción exclusiva del cartucho Smooth Breeze. La utilización de este cartucho permite un mover suave y preciso del mecanismo del grifo, como si se tratara de una brisa. Bruma EcoDrop

Para a Bruma a poupança de água é, mais do que uma preocupação, é uma obrigação.

Todas as nossas torneiras estão equipadas com sistemas de controlo de caudal que, misturando ar com a água, transmitem a mesma sensação de conforto de um grande caudal, mas usando uma quantidade menor de água. A Bruma coloca ainda ao dispor dos gestores de projectos, diversas soluções à medida que permitem controlar o caudal ou temperatura da água, de acordo com as características, necessidades e aspirações desses mesmos projectos.

Desta forma, facilitamos e promovemos uma utilização racional da água e da energia necessária ao aquecimento da mesma. Isto traduz-se num acto de poupança de água, energia e dinheiro.

Somos o primeiro produtor português a desenvolver e promover torneiras em aço inoxidável com a preocupação de proteger o meio ambiente.

Os modelos Inox, que se destinam à cozinha, não transferem sabor ou elementos tóxicos para a água e são 100% recicláveis. São características principais do aço inoxidável a resistência, a fácil manutenção e o aspecto moderno.

For BRUMA saving water is more than just a concern, it is our obligation. All our faucets are equipped with systems that save water by reducing the water flow and by adding air to the water stream, while producing a soft touch and non-splashing sensation. BRUMA works closely with project managers, tailoring solutions specifically to the unique requirements of the consumer or characteristics of their project. By offering solutions for flowrate and hot water control, it's much easier to promote energy efficiency and a rational use of water.

Pour Bruma l'épargne d'eau est, plutôt qu'un souci, une question de devoir. Tous nos robinets sont équipés de systèmes de contrôle de débit, lesquels, en ajoutant de l'air à l'eau, proportionnent la même sensation de confort d'un grand débit, en utilisant, cependant, beaucoup moins d'eau. Bruma met encore à disposition des gestionnaires de projets, plusieurs solutions sur mesure qui permettent de contrôler le débit ou la température de l'eau, selon les caractéristiques, besoins et aspirations de ces projets. Ainsi, nous rendons facile et nous promovons une utilisation rationnelle de l'eau et de l'énergie nécessaire à son chauffage. Cela se traduit en épargne d'eau, d'énergie et d'argent.

Para Bruma, el ahorro de agua es, más que una preocupación, una obligación. Todos nuestros grifos están equipadas con sistemas de control de caudal que, al mezclar el aire con el agua, transmiten la misma sensación de confort de un gran caudal, pero utilizando una cantidad de agua que es menor. Bruma también pone a disposición de los directores de proyectos, distintas soluciones, a la misma vez que permiten el control del caudal o de la temperatura del agua, de acuerdo a las características, necesidades y objetivos de esos proyectos. Así, facilitamos y promovemos una utilización racional del agua y de la energía necesaria a su calentamiento. Resulta en un ahorro de agua, energía y dinero.

Bruma Air EcoDrop

O sistema BRUMA AirEcoDrop proporciona uma poupança de água de 30%.

Quando a água é injectada no chuveiro, o ar mistura-se com a água, libertando um elevado número de iões de oxigénio - 1 litro de água mistura-se totalmente com 3 litros de ar. A queda da água será cada vez maior e progressivamente mais leve, simulado o revigorante efeito da chuva a deslizar sobre a pele. Com a mesma pressão, um chuveiro com sistema BRUMA AirEcoDrop tem uma saída de água mais forte e dinâmica que um chuveiro normal.

Transforme o seu duche diário numa experiência de verdadeiro SPA.

The Bruma AirEcoDrop system saves 30% of water. When water is injected into the shower, air mixes with the water, releasing a large number of oxygen ions - 1 liter of water mixed with 3 liters of air. With the Bruma AirEcoDrop system you will experience a rainlike feeling whilst showering. With the same pressure, this shower has a stronger output and a dynamic flow than a standardized one.

This way you can turn your daily shower into a SPA experience.

Le système BRUMA AirEcoDrop fournit l'économie d'eau de 30%. Lorsque l'eau est injectée dans le douche l'air se mélange avec l'eau, libérant un grand nombre d'ions oxygène - 1 litre d'eau est mélangée à fond avec 3 litres d'air. Sentez-vous l'effet revigorant de pluie de glisser sur la peau.

Avec la même pression, une douche avec système Bruma AirEcoDrop dispose d'une sortie d'eau plus forte et dynamique qu'une douche normale.

Transformez votre douche quotidienne en un véritable SPA.

Para a Bruma a poupança de água é, mais do que uma preocupação, é uma obrigação.

Todas as nossas torneiras estão equipadas com sistemas de controlo de caudal que, misturando ar com a água, transmitem a mesma sensação de conforto de um grande caudal, mas usando uma quantidade menor de água. A Bruma coloca ainda ao dispor dos gestores de projectos, diversas soluções à medida que permitem controlar o caudal ou temperatura da água, de acordo com as características, necessidades e aspirações desses mesmos projectos.

Desta forma, facilitamos e promovemos uma utilização racional da água e da energia necessária ao aquecimento da mesma. Isto traduz-se num acto de poupança de água, energia e dinheiro.

Somos o primeiro produtor português a desenvolver e promover torneiras em aço inoxidável com a preocupação de proteger o meio ambiente.

Os modelos Inox, que se destinam à cozinha, não transferem sabor ou elementos tóxicos para a água e são 100% recicláveis. São características principais do aço inoxidável a resistência, a fácil manutenção e o aspecto moderno.

For BRUMA saving water is more than just a concern, it is our obligation. All our faucets are equipped with systems that save water by reducing the water flow and by adding air to the water stream, while producing a soft touch and non-splashing sensation. BRUMA works closely with project managers, tailoring solutions specifically to the unique requirements of the consumer or characteristics of their project. By offering solutions for flowrate and hot water control, it's much easier to promote energy efficiency and a rational use of water.

Pour Bruma l'épargne d'eau est, plutôt qu'un souci, une question de devoir. Tous nos robinets sont équipés de systèmes de contrôle de débit, lesquels, en ajoutant de l'air à l'eau, proportionnent la même sensation de confort d'un grand débit, en utilisant, cependant, beaucoup moins d'eau. Bruma met encore à disposition des gestionnaires de projets, plusieurs solutions sur mesure qui permettent de contrôler le débit ou la température de l'eau, selon les caractéristiques, besoins et aspirations de ces projets. Ainsi, nous rendons facile et nous promovons une utilisation rationnelle de l'eau et de l'énergie nécessaire à son chauffage. Cela se traduit en épargne d'eau, d'énergie et d'argent.

Para Bruma, el ahorro de agua es, más que una preocupación, una obligación. Todos nuestros grifos están equipadas con sistemas de control de caudal que, al mezclar el aire con el agua, transmiten la misma sensación de confort de un gran caudal, pero utilizando una cantidad de agua que es menor. Bruma también pone a disposición de los directores de proyectos, distintas soluciones, a la misma vez que permiten el control del caudal o de la temperatura del agua, de acuerdo a las características, necesidades y objetivos de esos proyectos. Así, facilitamos y promovemos una utilización racional del agua y de la energía necesaria a su calentamiento. Resulta en un ahorro de agua, energía y dinero.
